---

seeking a challenge position as an engineer in your company where my academic background and interpersonal skills are well developed.

## EXPERIENCE

MARCH 2018 – NOW

**IT ENGINEER**, TATWEERMISR

- Install and configure windows OS"10,8,8.1 and 7", solve any OS problems, response requests from end users remotely, and office 365 for business.
- Trouble shooting hardware issues "Desktop and Laptop".
- Configure light current systems "DVR, NVR, analog and digital cameras, and time attendance solutions".
- Install and configure windows server 2012R2, manage features and services "AD domain service, DNS, DHCP, group policy management, Print server, file share server, WDS, and WSUS".
- Implement and manage a centralize antivirus solution "Kaspersky Security Center server", control Endpoint nodes, create schedule tasks and policies, and verify signatures data base updates.
- Manage updates using integration between WSUS and SCCM, hardware and software inventory, deploy software, and export reports.
- Design and administer printing solution "PaperCut MF" which can make secure printing, Quota per users or groups, notify and monitor all printers and printing jobs from a centralize place, integrate with AD to pull users, and BYOD feature.
- Implement and manage a new technology "Nexthink" which can monitor any end point, remote action, hardware and software inventory, monitor all traffics and services IN and OUT the network, collect end devices health check, capture malicious domains, and end device firewall RTP status.
- Configure and manage firewall solutions such as "FortiGate, Cisco ASA", create network policy, create site to site VPN connections, create remote access VPN, and apply IPS/IDS solution.
- Configure cisco routers and switches "access control list, routing protocols, high availability, ether channel, 802.1x, VLANs, DHCP, DHCP snooping, STP, syslog, AAA features, NAT, zone-based firewall, and CCP.

- Configure and manage backup solution “VEEAM backup and replication” which can create schedule backup tasks and can replicate backup to another directory for HA.
- Configure access points “cisco AP, Linksys, and others.
- Configure cisco IP phone using CME and CUCM.

## EDUCATION

JUN 2016

**BACHELOR’S DEGREE, HIET**

**THE HIGHER INSTITUTE OF ENGINEERING AND TECHNOLOGY IN ARISH**

Bachelor of engineering, department of communications and electronics, Very good overall rating with honors.

## SOFT SKILLS

- Creative
- Teamwork
- Effective Communication
- Problem Solving
- Self-study
- English

## COURSES

- CCNA R&S Certified
- MCSA 70-411 Certified
- CCNA Security IINS 210-260
- DHCP&DNS 2012 R2
- CUCM&CME
- CompTIA A+
- FortiGate Firewall
- VMware vSphere 6.5
- Wireshark+NMAP
- MCSA 70-410 Certified
- MCSA 70-412 Certified
- CCNA Collaboration
- CompTIA N+
- CompTIA Security+
- Kaspersky Security Center
- Cisco ASA
- Nexthink
- PCNSA

## TECHNICAL SKILLS

- Networking hardware - routers, switches, hubs, bridges, etc.
- Networking product vendors - Cisco, FortiGate, CUCM, PaloAlto, etc.
- Network and internet related protocols - TCP/IP, UDP, IPSEC, SSL, HTTP, HTTPS
- Networking technologies - VPN, VLAN, VoIP
- Antivirus and anti-malware software
- Firewalls
- Authentication and access control - Dot1x, ACS, TACACS+, RADIUS, LDAP
