VaporVM
Monitoring Breakdown

Monitoring suite used by our

Among two of the most widely used NMS at VaporVM. We have found it to be a reliable solution.

The most widely used solution. Almost all of the solutions that we have deployed use Nagios

This is a relatively newer NMS that we have tested out. Works great with our servers and VMs

Widely used to monitor VaporVM hardware

Our cloud specific monitoring solution of choice

Chart axis: 0, 2, 4, 6, 8, 10, 12, 14, 16

Chart categories: Zenoss, Nagios, Zabbix, New Relic, DataDog

Legend: Zenoss, Nagios, Zabbix, New Relic, DataDog

VaporVM
Managed/Professional Services

- VaporVM will provide full range of professional services that will include deploying and managing your infrastructure

- VaporVM proposes to provide you with complete Level 1/2 24x7x365 support for its customers

- VaporVM's NOC is uniquely capable of providing your customers with a full service offering that includes troubleshooting and triage and operational support for OpenStack

- VaporVM understands the need for immediate nimble response and a long-term resolution.

- Options for advanced services in the future such as Level 3 support for SDN and SW development

VaporVM
smart cloud

VaporVM DraaS Solutions

- VaporVM DRaaS is an enterprise-grade disaster recovery solution that provides rapid failover to a second site with the flexibility to boot from the appliance or cloud.

✓ Nearly zero downtime

✓ Lower Disaster Recovery costs

✓ Fast and reliable

VaporVM
